

WRITING AND COMMUNICATION CENTER

Writing Consultation

The Writing & Communication Center offers assistance with reading, writing and communication projects through in-person, online, and phone conferences. We work with all students in all programs. Our mission is to help students become stronger, more confident writers and communicators.

Students can meet with consultants at any stage of a project, such as understanding readings and assignments, brainstorming topics, evaluating evidence, and revising. We also help students prepare for multi-modal projects including in-class presentations and poster sessions.

Conferences are 25 minutes long, though students are welcome to sign up for two consecutive conferences.
