

Using Clickers to Create Interactive Surveys

Andreas Brockhaus
UWB Learning Technologies

[Basic Information]

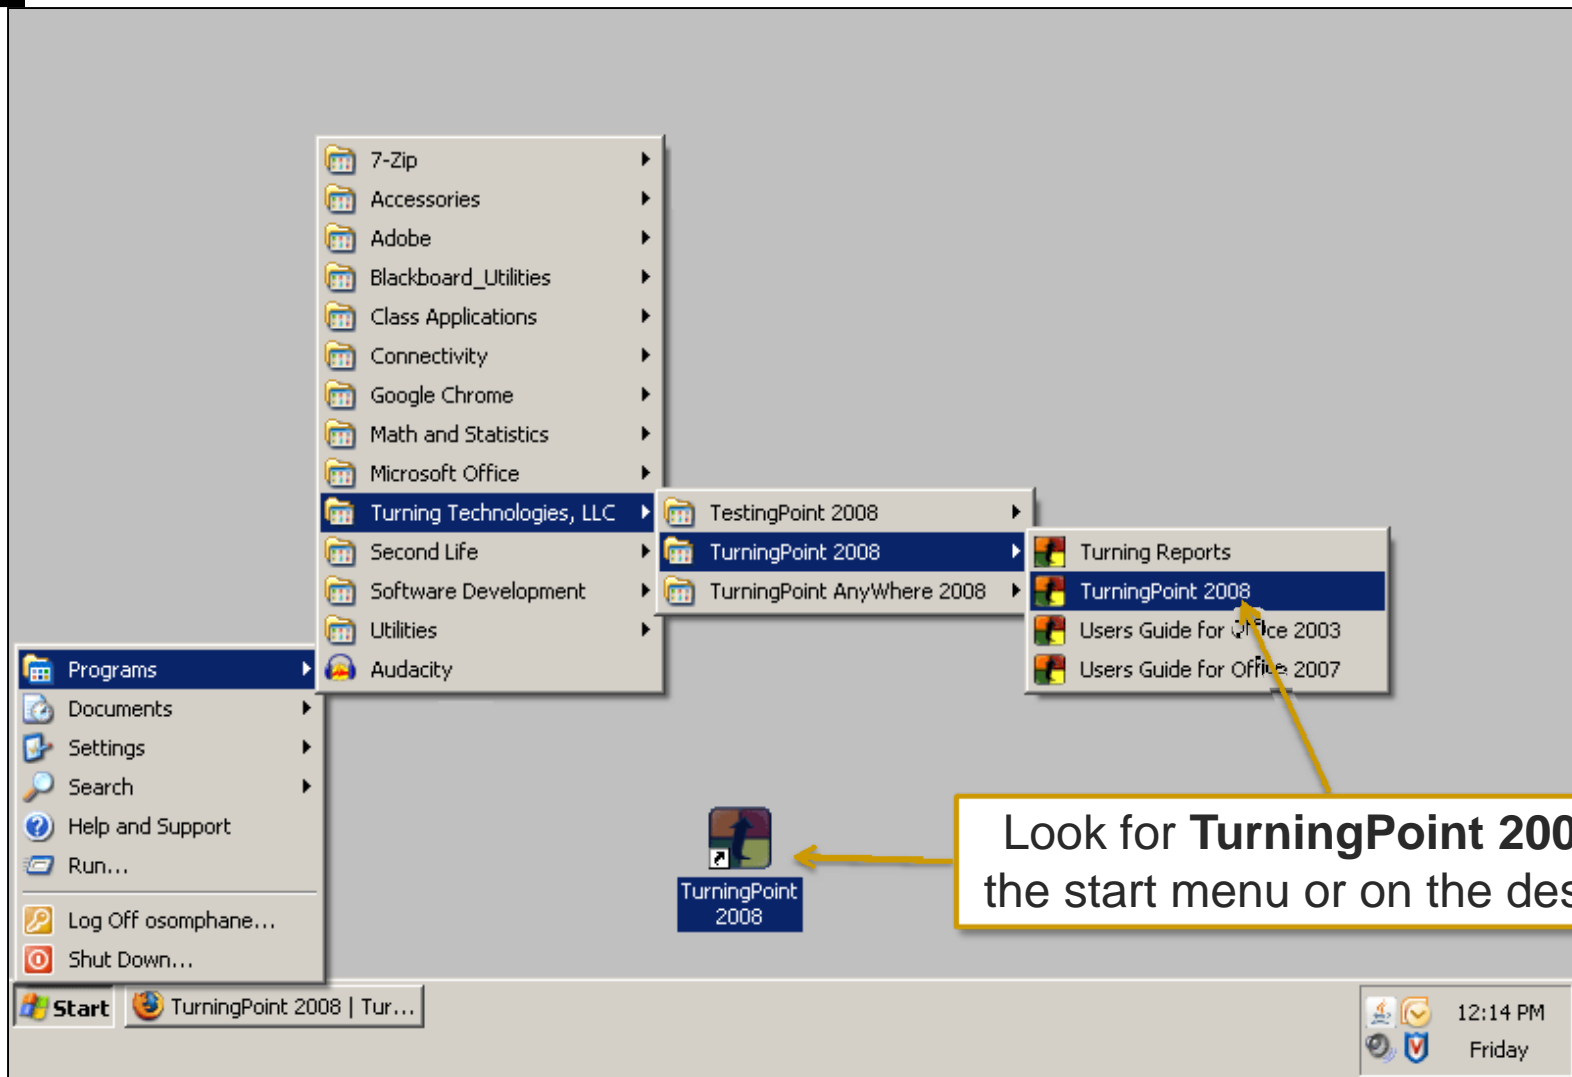

■ Software

- TurningPoint is used in conjunction with PowerPoint to create interactive presentations
- The required software is installed on all classroom ePodiums
- You may contact the UWB IT Helpdesk to have TurningPoint installed on your office computer
 - it@uwb.edu or (425) 352-3456

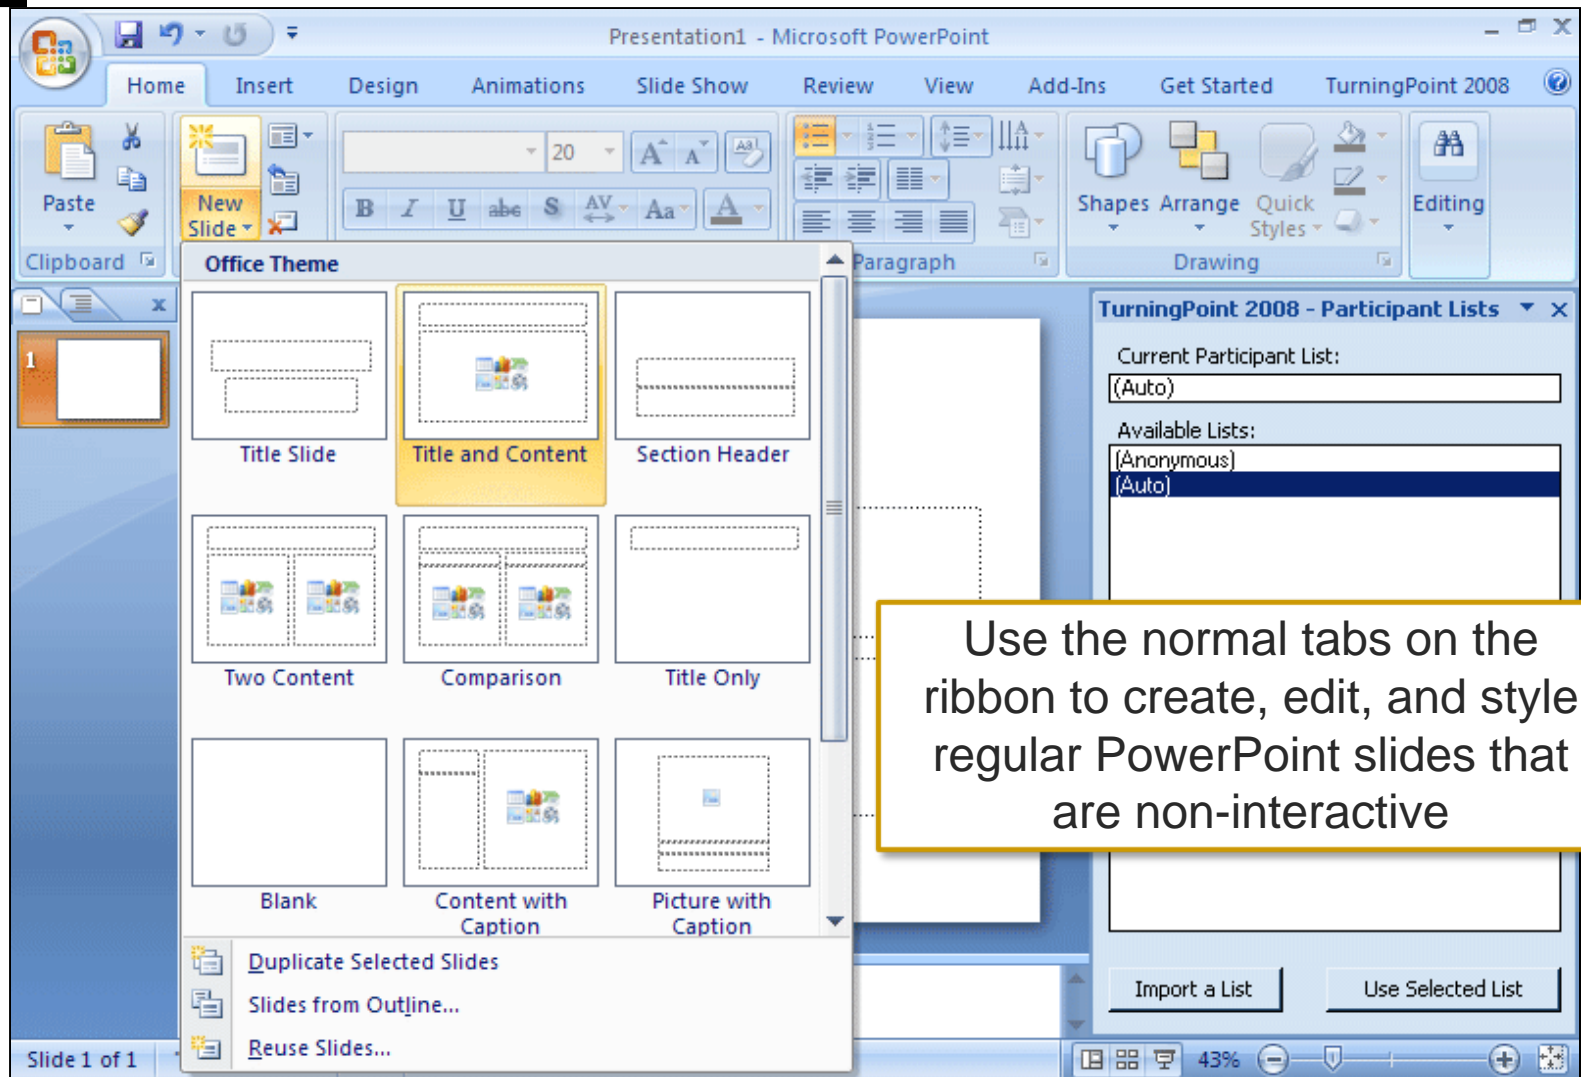

■ Hardware

- Two clicker kits with 45 units each are available for checkout from the UWB IT Helpdesk
 - it@uwb.edu or (425) 352-3456
- The clicker kits can be reserved multiple times per quarter
- Hardware is not required for developing interactive presentations

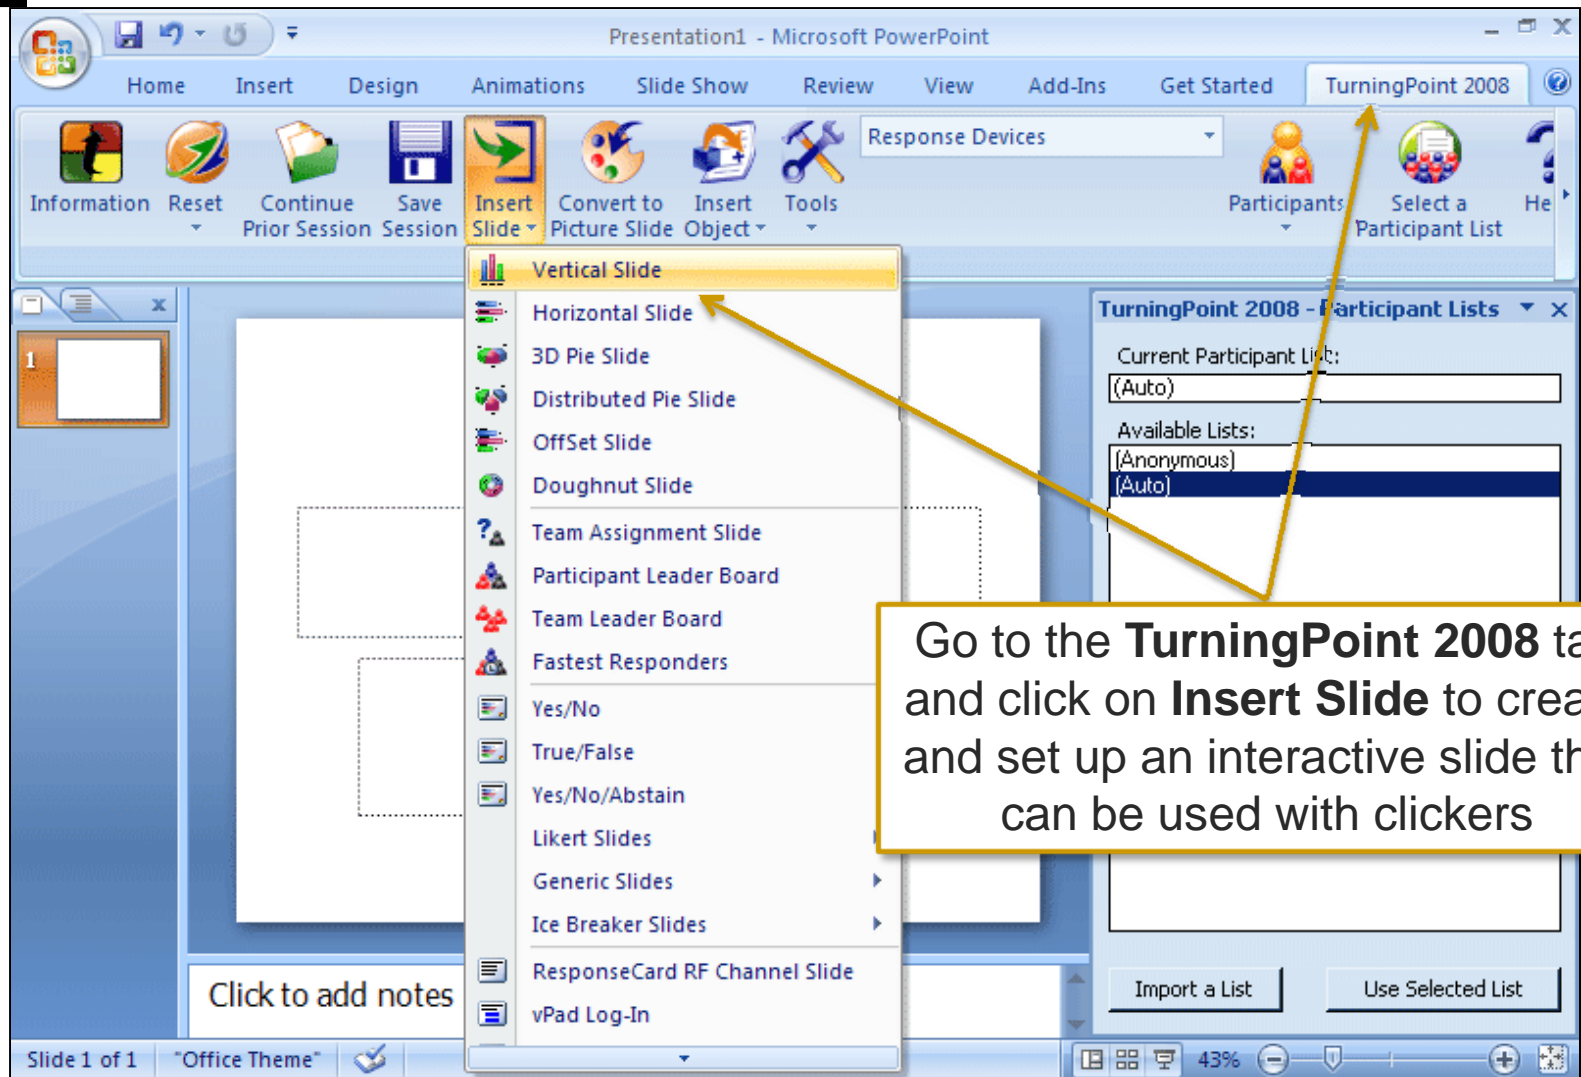

Starting TurningPoint

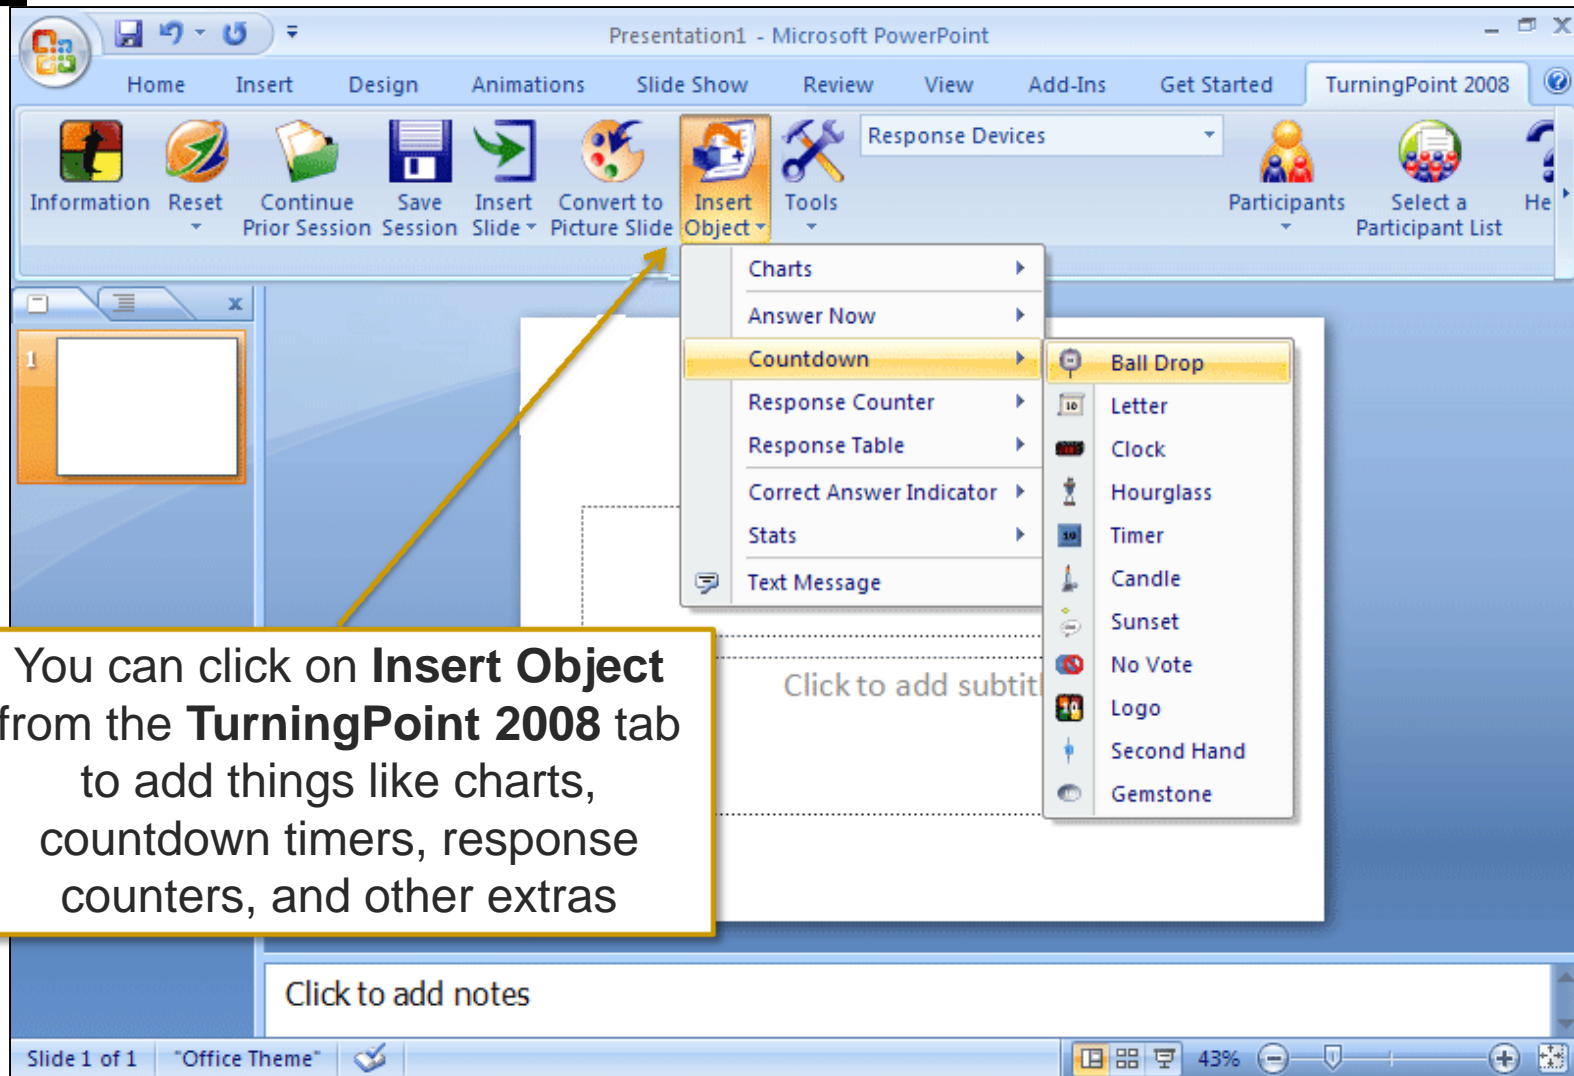

Creating Non-interactive Slides

Creating Interactive Slides

Creating Interactive Slides

[Running the Presentation]

Follow these steps in order for everything to work correctly:

1. Plug the receiver into one of the USB ports on your computer
 - It is recommended that you plug the receiver into the port on the front of the computer box rather than the monitor port
2. Start TurningPoint 2008
3. Open your presentation from within TurningPoint
 - Microsoft Office button > Open *shortcut: Ctrl + O*
 - If you simply double-click on your interactive file without opening TurningPoint first, then it will open in PowerPoint and **won't** work
4. If you have used this presentation before, reset it
 - TurningPoint 2008 tab > Reset > Session
5. Start your slide show in presentation mode
 - Slide Show tab > From Beginning *shortcut: F5*

]

[Presentation Mode

Re-poll current question; polling must be closed
shortcut: F4

Create interactive slides on the fly
shortcut: F5

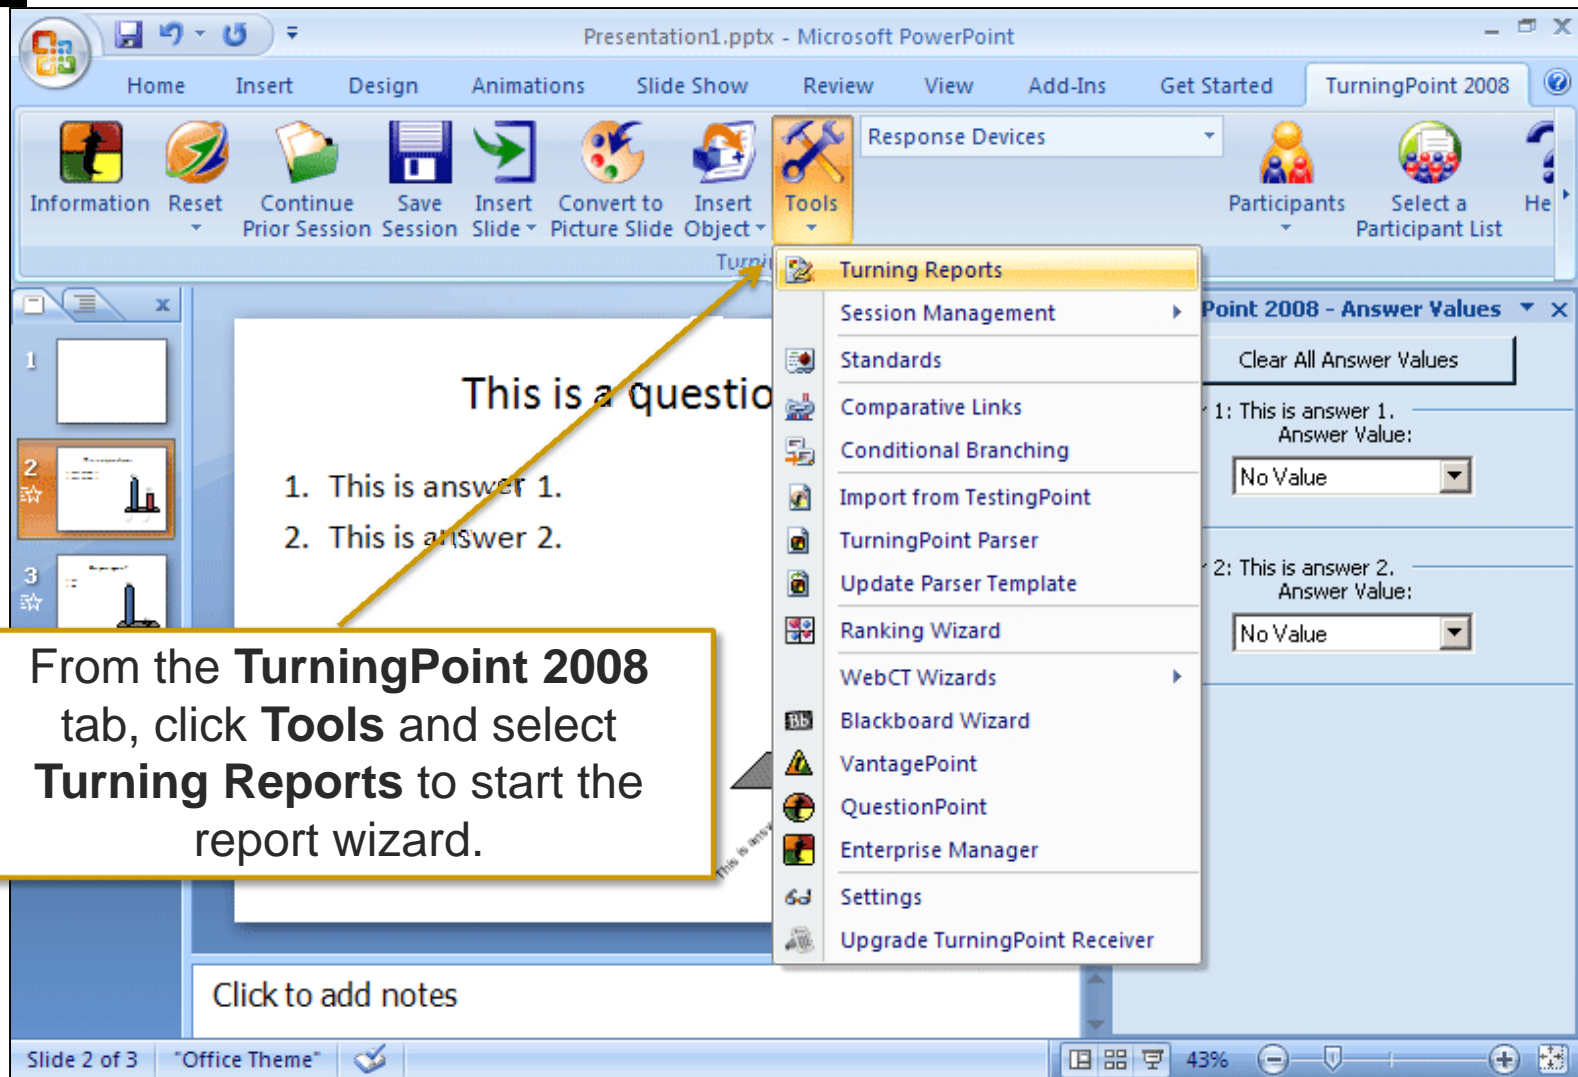

Green means that polling is open, red means that polling is closed; answers can be changed while polling is open

Saving and Resuming an Interactive Session

From the **TurningPoint 2008** tab, be sure to **Save Session** to save any of your data

Continue Prior Session allows you to import your saved data, which is useful when your presentation spans multiple class periods and you wish to continue with previous data. To skip the older slides when running a presentation, use **Slide Show** tab > **From Current Slide**
shortcut: Shift + F5

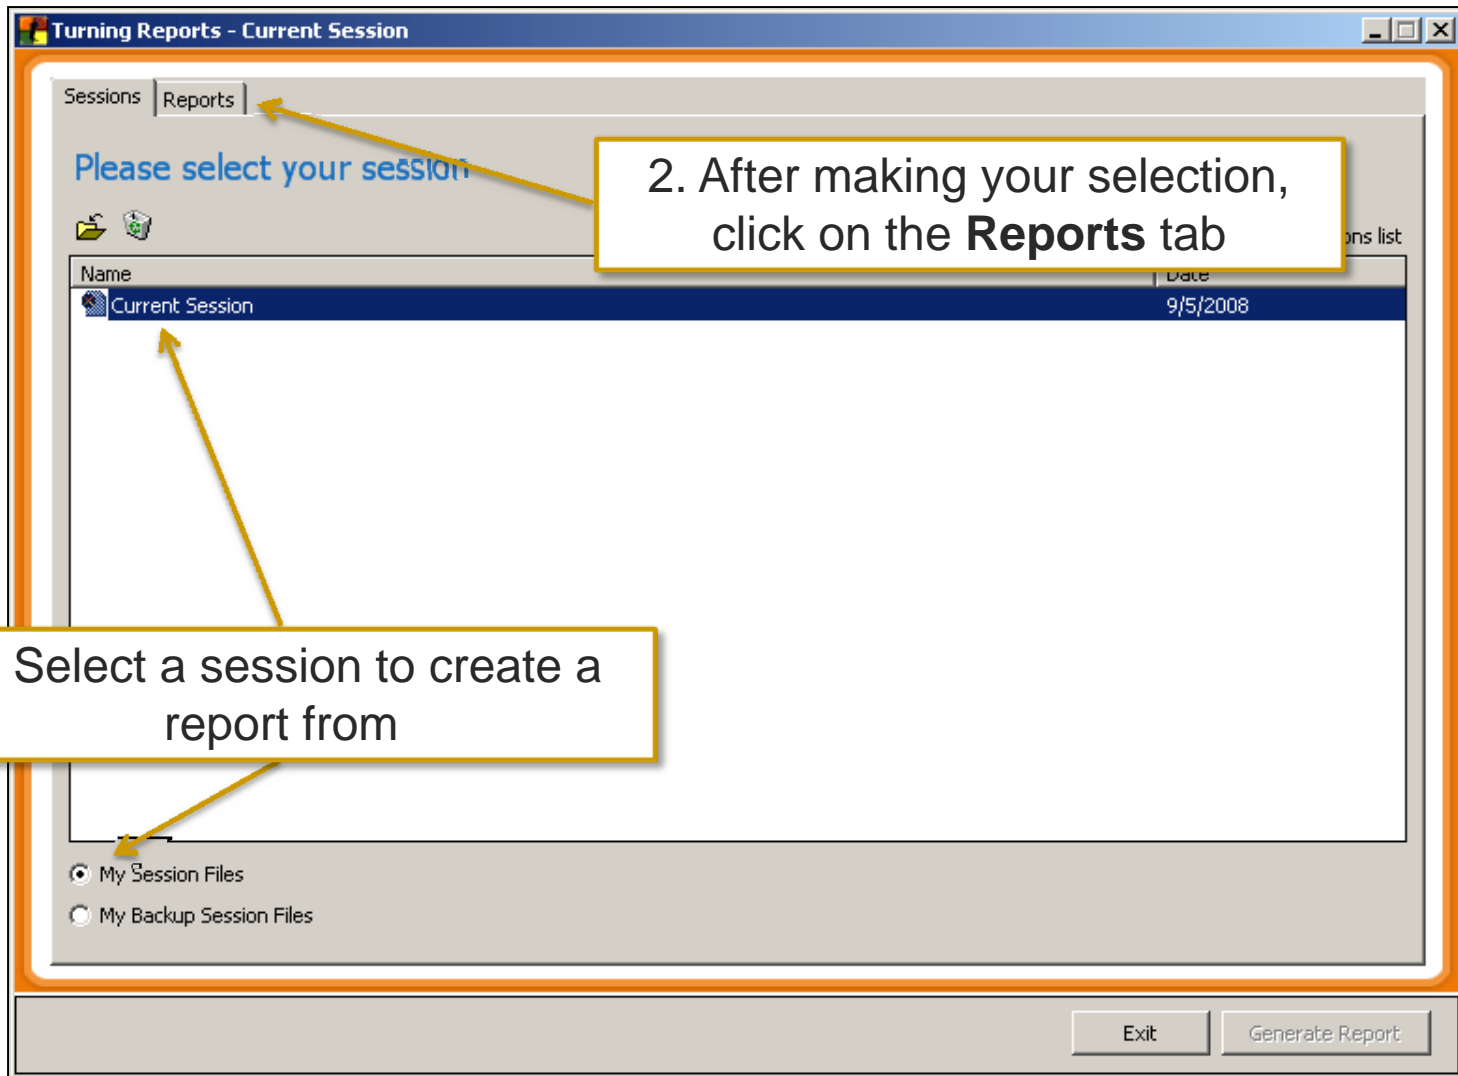

Creating Reports

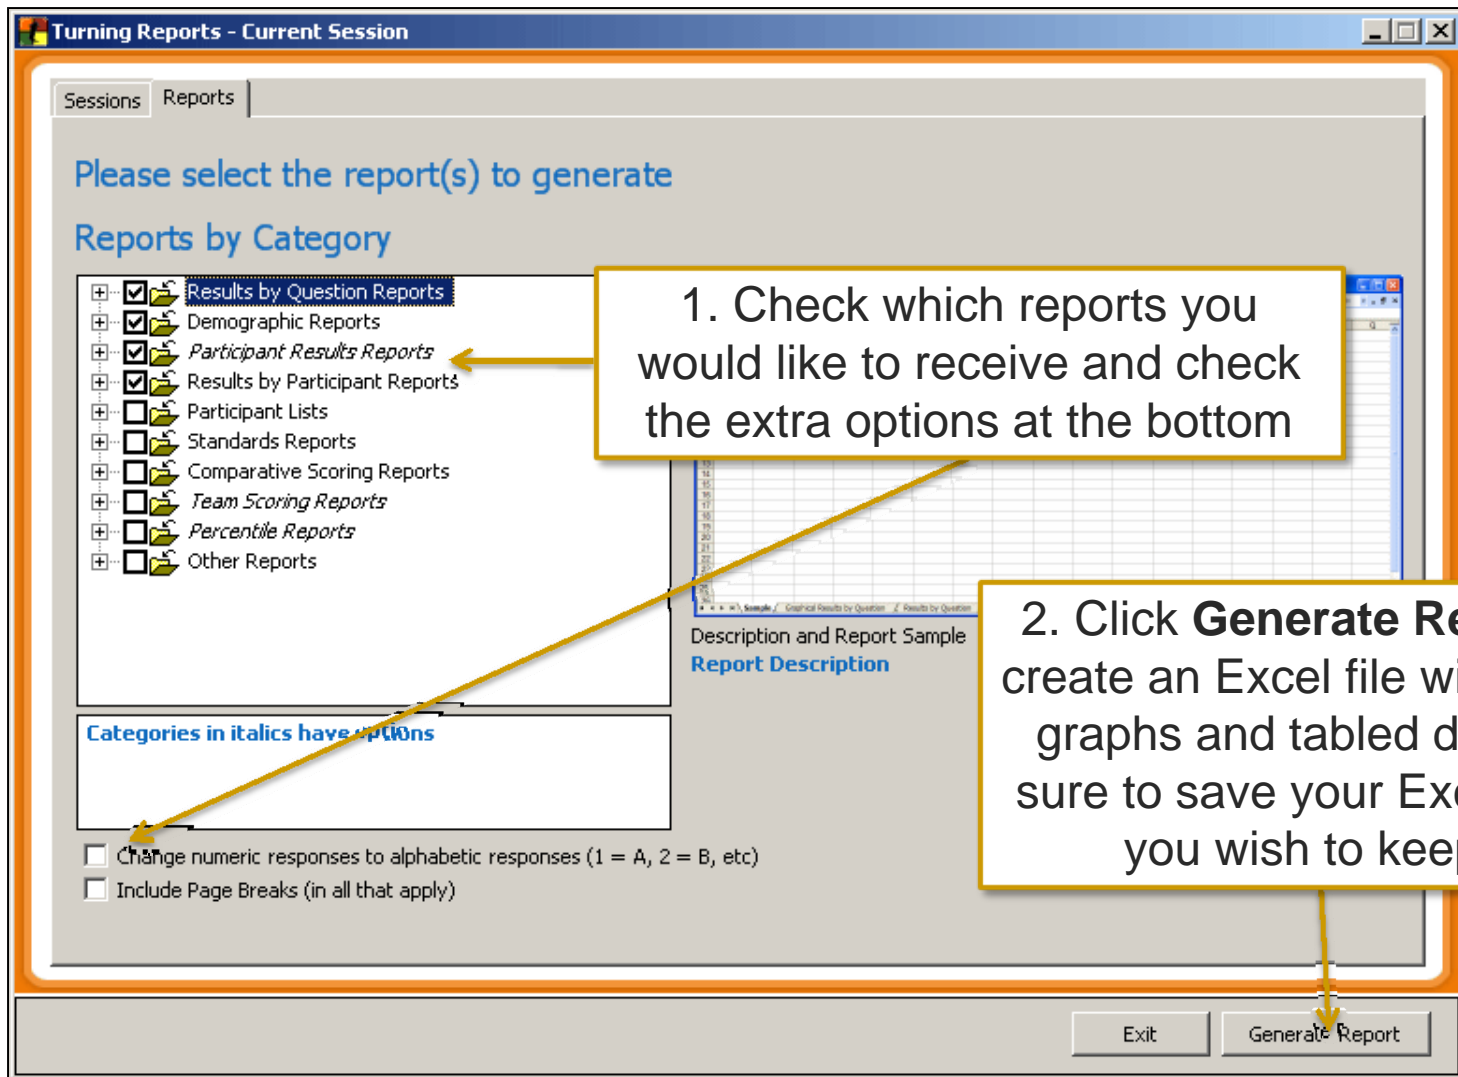

The screenshot shows the Microsoft PowerPoint 2008 interface. The 'TurningPoint 2008' tab is active. In the 'Tools' group on the ribbon, the 'Turning Reports' button is highlighted. A yellow callout box with an arrow points to this button. The 'Turning Reports' dropdown menu is open, showing options like 'Session Management', 'Standards', 'Comparative Links', 'Conditional Branching', 'Import from TestingPoint', 'TurningPoint Parser', 'Update Parser Template', 'Ranking Wizard', 'WebCT Wizards', 'Blackboard Wizard', 'VantagePoint', 'QuestionPoint', 'Enterprise Manager', 'Settings', and 'Upgrade TurningPoint Receiver'. The main slide area displays a question: 'This is a question' followed by two numbered answers: '1. This is answer 1.' and '2. This is answer 2.'. On the right, the 'Point 2008 - Answer Values' pane shows input fields for 'Answer Value' with 'No Value' selected for both questions. The status bar at the bottom indicates 'Slide 2 of 3' and 'Office Theme'.

From the **TurningPoint 2008** tab, click **Tools** and select **Turning Reports** to start the report wizard.
